CAREER OBJECTIVE

Full Stack Developer skilled in the MERN stack (MongoDB, Express.js, React.js, Node.js), JWT authentication, and Role-Based Access Control (RBAC). Experience deploying a College ERP System on Render and Vercel. Seeking a Full Stack Engineer role to build scalable, secure web applications using JavaScript, React, and Node.js.

WORK EXPERIENCE

Generative AI Intern

IBM SkillsBuild (in collaboration with AICTE / Edunet Foundation) — Virtual | Jun 2026 – Present

- Completed a Generative AI internship gaining hands-on exposure to core concepts of Artificial Intelligence, Machine Learning, and Generative AI models.
- Explored foundational concepts of Large Language Models (LLMs), prompt engineering, and Generative AI applications using IBM Watson and IBM Cloud tools.
- Built and experimented with AI-driven solutions applying concepts such as neural networks, natural language processing (NLP), and model fine-tuning.
- Completed guided modules and hands-on labs covering AI fundamentals, cloud computing, and ethical AI practices.
- Applied Generative AI concepts to a mini-project involving [insert your project topic, e.g., text generation, chatbot, content summarization – if you built one].

Software Development Program – Certificate of Selection

Unnesa Foundation — Virtual | Apr 2026 – Jul 2026

- Selected for a Software Development program conducted by Unnesa Foundation, recognizing academic merit and technical aptitude.
- Participated in structured training covering software development fundamentals, including programming concepts, problem-solving, and development practices.

Software Development Intern

JP Morgan's — Virtual | Oct 2025 – Jan 2026

- Developed and optimized software solutions using Java and Python, applying data structures and algorithms to enhance performance.
- Identified and fixed bugs, conducted testing, and collaborated using Git in a team environment.
- Implemented data structures and performed debugging and testing to improve application efficiency.
- Used Git for version control while contributing to a collaborative development workflow.

PROJECTS

Network Monitoring Application (Web-Based) — Apr 2026 – May 2026

- Built a web-based network monitoring dashboard using [tech stack] to track real-time bandwidth, latency, and device status, with alert notifications for anomalies and historical data logging.

Startup Trend Analyzer — Sep 2025 – Nov 2025

- Developed a full-stack AI-based web application that analyzes real-time data from GitHub, tech news, and online sources to identify emerging technology trends and startup opportunities.
- Implemented NLP and machine learning techniques to perform sentiment analysis, trend detection, and automated startup idea generation with opportunity scoring.
- Built an interactive dashboard using React and integrated REST APIs using Python (FastAPI) with a PostgreSQL database for efficient data processing and visualization.

Diet Planner – DietGuide — Jun 2026 – Present

- Built DietGuide, a React-based gym diet planner featuring subscription tiers, per-user data scoping, and Recharts-powered analytics for tracking diet plans and progress.

Portfolio Website — Feb 2025 – Mar 2025

- Developed a responsive and modern personal portfolio website using HTML, CSS, and JavaScript (React) to showcase projects, technical skills, and achievements.
- Integrated project sections, contact forms, and smooth navigation; deployed for public access with cross-browser and mobile optimization.

EDUCATION

B.Tech, Computer Science & Engineering

APJ Abdul Kalam Technological University | 2023 – 2027

Secondary Education (Class X)

St. Theresa High School, UP Board | 2020 | Percentage: 83.00%

SKILLS

Languages & Core: JavaScript, Java, Python, HTML, CSS, SQL, Data Structures, Object-Oriented Programming (OOP)

Frameworks & Libraries: React, Next.js, Node.js, Express.js

Databases: MongoDB

Tools & Platforms: Git, Advanced Excel, Power BI, Generative AI Development, Debugging

CERTIFICATIONS & TRAININGS

- **Full Stack Development With MERN** – NASSCOM Foundation (Jun 2026): MongoDB, Express.js, React.js, and Node.js, with hands-on application through a deployed College ERP System featuring JWT authentication and RBAC.
- **Full Stack Web Development** – PW Skills (May 2026 – Present): MERN stack, RESTful APIs, authentication, and deployment through hands-on projects.
- **Generative AI For Developers** – PW Skills (Jun 2026 – Jul 2026): LLM fundamentals, prompt engineering, and integrating generative AI tools into software applications.
- **Data Analytics With AI** – Sololearn (Sep 2025 – Nov 2025): Data analysis techniques enhanced with AI/ML tools for pattern recognition and insight generation.
- **What Is Software Development?** – SIMPLILEARN (Sep 2025): Software development lifecycle, methodologies, and foundational industry practices.
- **Visualize Your Data** – Sololearn (Apr 2025 – May 2025): Data visualization principles, chart selection, and dashboard design.
- **Introduction To HTML** – Sololearn (Mar 2025 – Apr 2025): HTML5 fundamentals, semantic markup, and web page structure.
- **Certificate of Participation, Bhartiya Antariksh Hackathon** – ISRO (May 2025 – Jul 2025).
- **Certificate of Recognition** – Amigo India, Lucknow (Oct 2024): Industrial visit to [company name] for exposure to real-world industry practices.

EXTRA-CURRICULAR ACTIVITIES

Active participant in college-level hackathons and technical fests; completed self-paced certifications in web development and cloud technologies to strengthen practical skills alongside coursework.

ADDITIONAL DETAILS

Selected for Unnesa Foundation's Software Development Program. Certified in Full Stack Development (MERN), Generative AI, and Data Analytics with AI. Received Industrial Visit recognition. Actively building and deploying full-stack projects.
